Winter II Bootcamp Project 1 😁

Creative - Developer Guidelines

Naming convention: camelCase 🐫

When targeting multiple selectors on CSS, have them on separate lines:
Example:

```
selector1,
selector2,
selector3,
selector4 {
        property: value;
        property: value;
}
```

Partials:
- setup
- variables
- mixins
- general
- header
- main *(can be further broken down into homePage, blogPage, contactPage)*
- footer
- mediaQueries

Color property: Hex and rgba for transparency - #UPPERCASE (ex: #FFF, #FFFFFF)

Commenting guidelines:
Good Example:

```
/* hello this is a comment haha */
selector {
        font-size: 2rem;
        background: #555;
        color: #000;
}
```
No comments in the middle of a CSS block

Not Recommended:

```
selector {
        font-size: 2rem;
        /* hello this is a comment haha */
        background: #555;
        color: #000;
}
```

Major Breakpoints (feel free to add more in between as needed):
- 940px
- 768px
- 480px

Hover: ~~Strikethrough~~

Wrapper:
- Max-width: 1200px
- Width: 80% *(90% for mobile is acceptable)*
